

On April 8, 2020, Zoom released an [updated version of their software](#) that includes important security changes. Go to the [Zoom Download Center](#) to get the latest version (4.6.10).

In addition to other changes, there is now a [Security icon in the host's meeting controls](#). When you host a meeting, you can easily remove a participant and turn on and off:

- A waiting room
- A lock on your meeting
- Screen Share
- Chat
- The ability for participants to rename themselves

To learn more about Zoom security, visit [Privacy & Security for Zoom Video Communications](#) or attend the [Zoom webinars](#).
