

Technology help desk

In order to better support the technology needs of students, staff, and faculty at New York School of Interior Design, the technology department will roll out new help desk system for support tickets starting in the Fall 2018 semester.

It is required that every technology request goes through the help desk system so that the technology department can keep track and find ways to improve. Please do not send email to IT@nysid.edu as this mailbox is no longer monitored by technology staff.

Instructions for submitting a request for technology support

Open any web browser and type helpdesk.nysid.edu

Fill out the form and click on submit

While you are at the help desk page, please visit the “Knowledge Base” section for FAQ
